# Results – 4-H Banquet Place Setting

**1-3-2-4**

**Cuts: 3 – 4 – 2**

I placed this class of place settings, 1-3-2-4. I found a close top pair and a close bottom pair in the choices.

I placed 1 over 3 as it was the only choice that included plates and utensils for the entire menu. I grant that the only items lacking in the number 3 choice were for the dessert which could be served afterward and separately. Neither choice included a placement of napkin.

For the middle pair placing, I placed 3 over 2, as the number 3 place setting included both the salad fork and salad plate. I grant that the number 2 choice included the dessert plate for the cheesecake. However, I fault the number 2 choice for not providing a dinner fork.

In the bottom pair, I placed 2 over 4, noting that both bread and dessert plates were included. However, I grant that the 4 choice included the dinner fork. I also fault both choices for the absence of a salad plate.

For these reasons, I place this class of place settings for a 4-H banquet, 1-3-2-4.
